PSCPets Joint Assist Treats with Probiotics for Dogs (2.2 Lb)

Veterinarian formulated

Click the Image Directly ^{^^^Above^^^} for More Information, Current Pricing and Availability. You will not be charged until after you review and complete your order. Contains all of the digestive benefits of PSCPets Digestive Dog Treats. Includes chondroitin sulfate and glucosamine to support your dog's joint health. Contains glucosamine, which is an amino sugar. Product Description Dogs love the peanut butter flavor of PSCPets Joint Assist Treats with Probiotics for Dogs. The crunch is satisfying and it is also good for your dog's teeth and gums. The treats contain beneficial bacteria that helps to support and maintain their gastrointestinal health and they are perfect for feeding to lactose-intolerant dogs because of their lactose-free recipe. PSCPets Joint Assist Treats with Probiotics contain chondroitin sulfate, a structural component of cartilage that is often added to glucosamine supplements because its use has been shown to help increase the efficiency of glucosamine. It also contains glucosamine, which is an amino sugar that is closely related to a major cartilage component and helps maintain joint and tissue function, as well as strong bones.
