This stainless steel bracelet serves as an edgy and modern way to display your specific medical needs with style. Fold over clasp Imported Product Description GSD site.com Stainless steel links and black rubber accents create this fashionable men's bracelet. Crafted in modern material, it will remain sturdy with wear and main a polished finish. This hand-selected assortment features an array of diamond, gemstone, and precious metal designs that receive a quality inspection, including from Amazon's staff graduate gemologist, to ensure they meet Amazon's high standards. All diamonds featured in the Amazon Curated Collection are certified by our suppliers to be conflict free, and IGI, GIA, or AGS certifications are provided on white diamonds of .75 carats or larger on all stud earrings, rings, and pendant necklaces. Stainless Steel Stainless Steel has increasingly grown as a popular metal choice for jewelry. Although it has a similar appearance to metal, Stainless Steel is much thicker and will not tarnish. Often made without nickel, this metal type is popular among those who may have metal allergies. Containing a more matte finish compared to silver and gold metals with stronger luster, Stainless Steel is a popular jewelry choice among men's jewelry. Caring For Your Stainless Steel Jewelry Stainless Steel jewelry is very easy to care for with its tough material that is able to endure a lot of wear and tear. This metal type is able to withstand moisture without tarnish or corrosion.
