Breeder of Quality Working Line German Shepherd Puppies

Coldwater German Shepherds of North Carolina Coldwater German Shepherd Dogs of North Carolina, home of quality working line German Shepherds and the Kaltwasser line of German Shepherd Dogs. A German Shepherd puppy can be your family's next best friend and your home's first line of protection! We are a small family operated kennel located in the Northern Piedmont area of North Carolina. Our dogs are selected from imported stock of West German, Czech Republic, DDR, and Dutch working lines of German Shepherd Dogs. All of our dogs are clear for hips/elbows and health evaluations. I only have dogs with excellent temperaments, good minds, strong character and nerves, nice structure and willing to please attitudes. Puppies will all have plenty of drive for training and working, but not over the top prey-monster types. Some will have more drive than others and will be very suited to sport, police K9, and other working endeavors. While other puppies will be a bit more laid back and fit in well with families as companion dogs. Over these years Janette has evaluated many hundreds of puppies and has become very adept at pegging what an individual puppy will be like as an adult.
