California German Shepherd Dog Breeders Since 1985

Our dogs are bred to be mentally healthy, physically sound, intelligent, have lots of character, personality, and heart, and be livable. They are capable of almost anything. They are the most versatile of any breed. They are childproof, when raised properly. Our breeding animals are selected on their ability to learn, temperament, and of course, health background. We breed to dogs that will compliment and improve our existing stock. They are instinctively protective without being aggressive. Soundness, health, willingness, trainability, and mental stability are priorities in our breeding program. We abhor dog aggressiveness. Trendy breeding or breeding for beauty only is NOT a consideration. Our dogs do have the ability to reason. All of our breeding stock is OFA (Orthopedic Foundation for Animals) certified. Dogs of German origin are "a" stamped. Our proven record is becoming more apparent as the years pass. Because of genetic faults in any breed, our dogs are fully guaranteed. Even by using all of the genetic screening tools available to breeders, an occasional problem may arise. We guarantee our animals because of this fact. All of our dogs are von Willebrand disease tested. They are all Temperament Certified (TC). We choose to certify their eyes of phenotypical disease. Their thyroid evaluations are normal. We register all of our dogs through the AKC (American Kennel Club). They are permanently tattooed on their inner thigh with their AKC registration number or tattooed in their right ear for Hinterland litter identification. Our kennel is permanently registered with the SV in Germany and Schutzhund U.S.A. Our German Shepherd puppies are bred for impeccable character, versatility, intelligence.
