Displaceable Jump Bars help prevent dog injury. Unique 3 point ground contact design gives added stability on uneven surfaces. Features three 48" jump bars that are easily adjustable in height and width for any size dog. Full range of height and width combinations from 4" to 26" as described in our enclosed guide. Product Description The Triple jump is an obstacle that most people add to their course later on, but more often than not, it is an obstacle that many dogs stumble over in an agility trial! The challenge is for your dog to clear the jump by not only jumping high, with distance. This practice jump is fully adjustable following AKC guidelines, but not to their dimensional specifications. The 2 vertical bars inside the Triple Jumps frame slide back and forth horizontally so you can space the bars as wide or as narrow as they need to be. Displaceable jump bars rest on 3 pairs of clip-on jump cups that slide up and down on the vertical poles. Made from UV stabilized furniture grade plastic pipe makes this jump not only light weight, but also weatherproof. Includes easy assembly directions and tape for decorating
