Channel Weave 6 Pole Set

The upright poles pivot on a specially designed swinging arm

Click the Image Directly ^{^^^Above^^^} for More Information, Current Pricing and Availability. You will not be charged until after you review and complete your order. The poles are 36" tall, spaced 24" apart. The upright poles pivot on a specially designed swinging arm. The width of the channel that can be created is adjustable to a maximum distance of 18" in width. You may connect two or more Channel Weave sets together to make a 12 Pole Channel Weave Set. Product Description: The Channel Method of training is two parallel rows of weave poles put side by side, but offset in such a way that the dog has a center channel to run down. At first your dog is not weaving, but by slowly bringing the poles closer together, inch by inch, your dog will begin to weave without him even knowing it! When all poles are eventually brought fully together, it is a straight line of poles. The poles are 36in tall, spaced 20in apart, and 1in thick. The same distance between the poles is used for all size dogs. The poles rotate on their own fixture, allowing for infinite adjustments. Includes tape for decorating the poles, easy to use assembly instructions, and training tips. Another set of 6 can easily be added to make a set of 12 pole weaves.
