Practice Crawl Tunnel

Used in K9 training to challenge the dogs to crawl through low places to get to a target location and retrieve something.

Click the Image Directly ^{^^^Above^^^} for More Information, Current Pricing and Availability. You will not be charged until after you review and complete your order. Frame made from furniture grade 1" outer diameter pipe (3/4" inner) Fabric roof is made from waterproof rip-stop nylon Includes 4 internally sleeved rods for the fabric roof support Roof adjusts to heights of 24", 20", 16", 12", and 8". When assembled, measures 75" long by 33" wide and 33" high Product Description The Crawl Tunnel is a unique obstacle that is used in UKC trials. It is also used in K9 training to challenge the dogs to crawl through low places to get to a target location and retrieve something. The height of the fabric roof is adjustable. Start it off high, then as your dog is crawling through to the other side you can lower the roof even more. Before long your dog will become so confident in crawling that he might voluntarily offer to crawl under your bed to retrieve your slippers! Assembly instructions included, and can easily be taken apart for portability
