Each effervescent tablet mixes with water to make 32 fl. oz. of ready-to-use solution. You will receive one (1) tablet; plus 32 oz. bottle and hose-end sprayer attachment.

Product Description Your Solution To Lawn Damage From Dog Urine

Grass Revitalize creates a healthy, productive environment that is essential for superior turf growth and vitality. The microbial activity introduced into the soil stimulates root growth, mass, and length, quickly counteracting the damage done by dog urine. Grass Revitalize is an environmentally safe, all-natural solution to dog urine damage. A revolutionary development in live microbial treatments, Grass Revitalize contains all the living organisms needed for a thriving, healthier lawn. Contains a liquid blend of bacteria, minerals, and micro-nutrients and has been scientifically developed for optimal effectiveness. In addition to enhancing the bioavailability of fertilizer and decaying organic matter, Grass Revitalize bacteria colonizes on the hair-like structures of the plant root to increase nutrient absorption and stimulate growth. For best results, Grass Revitalize solution should be used within 2 weeks after mixing. (If you only need to apply a small amount at a time, the tablet can be broken into smaller portions before use, such as in quarters. Simply add one quarter to water at a time, storing the remaining pieces in the original foil container or in a watertight ziplock style bag until ready to use.) Normally, we recommend re-applying Grass Revitalize every 2-3 months. Ships in tablet form. Each effervescent tablet mixes with water to make 32 fl. oz. of ready-to-use solution; treats 8,000 sq. ft. of lawn.
