Specific features include the 20" (50cm) round non-slip textured training surface and a 2.5" (6cm) wood fulcrum for full 360° dynamic rotation. While your dog works to stay centered on top of the balance board, your dog's core muscles will engage and strengthen.Balance training can help dogs with body awareness (proprioception) and self-confidence as they learn to master changing and unstable environments. Puppies can be started early with balance training.The FitPAWS Wobble Board can also be used for targeting specific limbs for weight-bearing therapy and muscle strengthening rehab. It is an essential cross-training tool for the sporting dog and performance dog and will help keep your dog in top competitive condition. The family dog will benefit too, as you interact with your canine companion to keep it balanced on the board. An active body + an active mind = a happy dog!
