Veterinary formulated Helps prevent yellow spots on grass Helps prevent lawn burn Very effective in maintaining a spotless lawn 150 count Product Description Size: 150 Count Dog urine and lawns don't always mix well. The fundamental problem is that urine is a waste product containing excess nitrogen resulting from the natural metabolism of protein within the body. When dogs urinate on grass, urinary nitrogen mixes with the nitrogen already present in the soil and "burns" the grass. Nutri-Vet lawn protection supplements are formulated to reduce urinary nitrogen and help reduce grass burn and maintain a "spotless" lawn. Grass Guard max chewables with probiotics and digestive enzymes liver flavor chewables for dogs contain a unique blend of probiotics, digestive enzymes, amino acids and botanicals to help prevent lawn burn and yellow spots on grass. Veterinary formulated to help neutralize nitrogenous waste and maintain slightly acidic urine, Grass Guard Max is easy to give, extremely palatable and very effective in maintaining a "spotless" lawn. Important Information Ingredients Beef Liver, dl-Methionine, Maltodextrin, Cellulose, Dextrose, Maltose, Stearic Acid, Barley Grass, Yucca Schidegera, Silicon Dioxide, Tomato Pomace, Dried Milk, Magnesium Silicate, Magnesium Stearate, l-Cysteine, Cranberry extract, Aspergillus Niger, Aspergillus Oryzae, d-Calcium Pantothenate, Lactobacillus Acidophilus, Lactobacillus Salvarius, Bifidobacterium Bifidum, Streptococcus Thermophilus, Thiamine Mononitrate, Pyridoxine Hydrochloride.
