Working German Shepherds From The Mission Valley

Sapphire Shepherds Sapphire Shepherds believes the German Shepherd should remain a healthy working dog and we breed to achieve that goal. Genetics are the focus of our breeding program. We understand the value of learning from the mistakes and successes of those wise breeders who have come before. The superior bloodlines offered by Sapphire Shepherds are tried and true, historically proven over decades to consistently produce versatility time and time again. The breeding program of Sapphire Shepherds is purposefully small, each breeding is carefully planned and the results critical to the kennel's success. We breed to produce healthy German Shepherds that carry the characteristics to work successfully for various needs. We produce German Shepherds that will fit into and improve our own future program goals or help expand genetics for others. We work with private owners and government run kennels around the world. Sapphire Shepherds follows the time-honored formula of producing, hand selecting and training our own exceptional females which possess quality and health, combined with superb pedigrees. Our males are also selected for quality and health, and their ability to produce versatile workability. All content of this listing belongs to the Owner in this Listing!
