Independently tested for safety and purity at NSF, NASC & cGMP labs. Made in USA. RISK FREE GUARANTEE: Finish the bottle and if you're not delighted with the results, we'll give you all your money back. Please read all label information on delivery. Product Description: [GSDsite.com](#) Why is Rejenease the Best Glucosamine Supplement for Dogs? 1. You can expect to see fast, dramatic results. 7 DAYS: many of our customers begin to notice their pet moves with less pain and stiffness. 30 DAYS: dogs who have been barely able to move roll back the years and walk, run and play just like they used to. 2. Rejenease is better than tablets or chews. Liquid Rejenease delivers more glucosamine for cartilage repair because it is absorbed faster than tablets or chews. 3. Made with the best ingredients. Every natural drop contains the best ingredients, trusted and recommended by veterinarians and 3rd party tested for safety and purity. 4. Rejenease gives your pet a dose that works. Not all glucosamine supplements are the same. Many contain levels of glucosamine well below the recommended dose. 5. Easy to use and even the pickiest dogs love it. Our liquid mixes easily with food or water to take the hassles out of supplementation. 6. Rejenease reverses joint damage transforming your pet's life. A healthy dog's joints are protected by cartilage which acts like a cushion between the bones in a joint. Dogs suffer joint problems and painful arthritis as their cartilage wears out. Rejenease quickly repairs and rebuilds the protective cushions of cartilage. 7. Risk free. Give your pet the recommended daily dose until you've finished the bottle. If you're not delighted with the results we'll give you all your money back. No Questions Asked. Give your dog Rejenease; the best glucosamine supplement and watch their happiness and energy return as their pain and discomfort disappear.
