We breed and train German Shepherd Dogs

SCHWARZER HUND GERMAN SHEPHERDS We breed and train German Shepherd Dogs & other working breeds for; working, protection, family, sport (schutzhund) and companionship. Our dogs have been selected from solid, mainly working, German (W& DDR), Belgian and Eastern European bloodlines. After thoroughly researching the breed we have selected lines and dogs in an attempt to reproduce in both appearance & working ability, the "altdeutscher," or old-style German Shepherd Dog, while still adhering to the confines of the modern GSD breed standard. We feature solid-black, blanket back and sable German Shepherds (though we offer most all colors and patterns as well as both short stock and long stock coat German Shepherds). Aesthetics aside, our prime objectives in breeding are; soundness, even-temperament, ability and intelligence. Our breeding stock is in top physical condition & pups come with a contractual health guarantee covering all major diseases, as well as hereditary hip and elbow dysplasia. We pride ourselves on helping select just the right pup or adult to suit a client's specific wants and needs. Please visit our guest book to read what prior clients have to say about our breeding program and customer service, & feel free to contact us via email or our toll- free-number (1-800-766-1804) if you have any specific questions about our dogs, or even the German Shepherd Dog generally. All inquiries are welcome & will receive a prompt and courteous response. Puppies receive their first vaccinations and a thorough physical examination from our veterinarian at six weeks of age. They are socialized by exposure to diverse people (especially children), dogs and environments & at 7 weeks are tested with the Volhard aptitude test to assist in placement. Our Dogs and puppies will only go to homes where they can be properly cared for and after they have reached a minimum of 7 weeks of age. We deliver our adult dogs & puppies worldwide.
