This booklet provides a step-by-step dog training program of desensitizing and counter classical conditioning. It can help you solve minor dog problems and prevent serious ones, whether your dog's fears include the vacuum cleaner, people with hats, or the stranger at the door. Covered are the oh-so-important details related to identifying exactly what triggers your dog, creating a step-by-step treatment plan, monitoring your progress, and why you need to treat the fear and not just your dog's reaction to the fear. This booklet is on the "Top- Ten" of Dogwise's Dog Training Book Catalog, and has helped thousands of dogs and their owners around the country.
